

Reliable, Secure & Compliant Disaster Recovery

A Canadian Public Health Organization

This Canadian Public Health organization is a local public health agency with over 300 staff and 150 volunteers who deliver public health programs and services to the people of their area. The underlying goal of their services and programs -from immunization, healthy weights, nutritious eating, food safety, raising healthy babies and children, sexual health, tobacco use reduction, and many other public health areas -is to promote and protect the health of the more than 180,000 residents of their local geographic region.

The Challenge

A CONTROLLED DR SOLUTION

The need for off-site private cloud disaster recovery solution with full access to all scheduling & data, eliminating the need for third party management.

DATA RESIDENCY

Ensure that data residency complies with all provincial & federal privacy laws

COST EFFICIENT

A high quality solution that is highly available, flexible, secure, at the same time cost efficient for a publicly funded health organization.

The Solution

The public health organization was able to leverage Server Cloud Canada's SCC Vault to create a self-managed private off-site cloud based disaster recovery strategy.

With the infrastructure being located 100% in Canada with 9 datacentres across the country, the SCC Vault provides complete compliance with all federal and provincial privacy laws.

This turn-key solution also fits into the organizations yearly budget, without sacrificing security & access.

The Results

- ✓ A secure, manageable, and flexible DR strategy
- ✓ A high quality, cost effective plan
- ✓ Compliance with all federal and provincial privacy laws

Solution Overview

DESCRIPTION

An improved disaster recovery solution that meets the needs of a Canadian public health agency

INDUSTRY

Health Care

GEOGRAPHY

Canada

CHALLENGES
